I chose my great grandma Minerva Pearl Hatch for my ancestor essay. I chose her because she's my only great grandma that spent time with me.

She was born in Randolph, Utah on November 23, 1935. Her parents were Ivan Ray Hoffman and Arvella Pearl Gunn. She also had 1 sister and she used to love to ride in a sidecar around Bear Lake with her sister and her parents every single Sunday. She got married on August 22, 1952 to Roger J. Hatch when he worked in the army at Area 51. In my opinion, I think that's awesome. I want to work in the army and then work in Area 51 like him.

She was only 16 when she married him. I think that's weird in my opinion. I think you should get married at 18. She also did not graduate from high school. She also had 5 kids whose names were Dar, Ashley, Tyler, Mike, and Tyson.

She moved several times until they finally settled in Alamo, Nevada. They lived there for 30 years. Then I was born and my Great Grandpa Roger J. Hatch died.

I was 6 years old when I first met my grandma Minerva Pearl Hatch. I had a lot of stuff in common with her. We both loved playing cards like

Black jack, Tonk, Mormon bridge, President Trump, Tinker, Camp Stump and we both loved tuna and mayonnaise sandwiches. I started making candy every Christmas with her. I loved hanging out with her.

When Roger J. Hatch died. She was super sad . Then she started living with my Gramma Dar or her little kid. My Gramma Dar lived in Alamo, Nevada. My Gramma Dar found her dead in her room. I was so sad when she died. It was November 23, 2021. It was the saddest day in the world for me. I hope you liked my essay.
