

Cause of Lockjaw

Lockjaw, tetanus, is caused by bacillus or germ which exists plentifully in street dirt. It is inactive so long as exposed to the air, but when carried beneath the skin as in the wounds caused by percussion caps or by rusty nails and when the air is excluded the germ is roused to activity and produces the most virulent poison known. These germs may be destroyed and all danger of lockjaw avoided by applying Chamberlain's Pain Balm freely as soon as the injury is received. Pain Balm is antiseptic and causes cuts bruises and like injuries to heal without maturation and in one third the time required by the usual treatment.

For sale by All Druggists.

A small bunch of keys, found last Wednesday, has been left at this office. Owner may have same by proving property and paying for this notice.

All law-abiding citizens opposed to the evils of intemperance are cordially invited to attend a mass meeting at the Tabernacle next Tuesday evening to devise means for the suppression of the liquor traffic in Cedar City, and to discuss the advisability of nominating a prohibition ticket at the coming municipal election. The meeting will be addressed by Prof. Porter and Lewis of the Branch Normal, Dr. Middleton and others. Every person sincerely interested in the welfare of the community and the rising generation should attend. By order of committee.
