

MORE TALK OF ELECTRIC LIGHTS

**J. W. Clark, Manager of Milford Plant,
Wants Information.**

CONSIDERING BOTH WATER & STEAM.

**Prospects for Installing of Plant Seem
Encouraging, as Cedar is Bet-
ter Field than Milford.**

Mr. J. W. Clark, proprietor and manager of the Milford Electric Lighting plant, has written a letter of enquiry to the city council asking for information in relation to the facilities for putting in an electric lighting plant in this city. The gentleman made special enquiry in relation to water power and the price of coal. It is quite likely that another franchise will be asked for, and if it is, the probabilities are that this time something will be done, as Mr. Clark is familiar with just what outlay is likely to be required, and what may be expected in the way of profits. Cedar certainly ought to be as good a field for such an enterprise as Milford.
